

No Sew T-Shirt Totes

INSTRUCTIONS

Wash and Dry the T-shirt

Cut off Sleeves - I cut about 1 inch in and followed the seam.

Cut out the neckline - I cut about 4 inches down from the natural T-shirt neckline.

Cut the bottom of shirt - I cut about 1 inch strips you are cutting both front and back of the shirt at the same time. Cut from Edge to edge.

Decide if you want your bag to have the bottom tassels or not for your no-sew t-shirt bag

If you want to have tassels hanging out skip this next step and don't turn your t-shirt inside out I wanted a clean line bag so I turned the T-shirt inside out

Start the bottom knots by tying ONLY the first knot in the first set of strips. Then the one wider edge strip by it across the knot you just made. Now you will tie the second knot this will now attach that wider strip.

Then start tying two knots with the strips across from each other, working your way down the shirt bottom

Repeats step 6 for the last set of strips as well. If you tied the knots and have the wider strip opening you can always just tie a 3rd knot with it laid over to seal the edge.

Now you turn the t-shirt bag right side out again. (If you wanted tassels there is no need to turn your t-shirt bag inside out.)

Enjoy your new No-Sew T-shirt Tote Bag!

NOTES

If you want a larger t-shirt bag use a large shirt, or if you want a smaller tote bag use a smaller shirt
